The Sustainable  
Choice  
from British Sugar

## Lawn Dressing

**British Sugar TOPSOIL's Lawn Dressing is a high quality, sand based, multi-purpose dressing, designed for use on lawns.**

Lawn Dressing is a blend of 80% medium and coarse sand with 20% British Sugar BS3882:2015 compliant TOPSOIL. Lawn Dressing combination of specialist sand and soil is ideal for grass establishment and maintenance.

The sand is predominantly medium to coarse and sub angular in shape, which assists free drainage and promotes good integration into the surface of the lawn. The soil within the blend contains both phosphorous and potassium, which contributes to soil fertility and encourages healthy growth.

Senior Horticulturist at King's College, Cambridge – Steve Coghill – has been carrying out his own trials with Lawn Dressing on the formal lawns that grace the College grounds. Areas that had suffered from compaction and poor drainage received 40 tonnes of Lawn Dressing in the autumn of 2016 and Steve is delighted with the results so far: "British Sugar TOPSOIL's Lawn Dressing is a fantastic dressing, promoting growth and helping improve drainage. It is also an excellent substrate for sports turf renovation and repair."

## Features

80:20 Sand:Soil Mix

SubAngular Sand

Coarse and medium sand

20% British Sugar TOPSOIL

STRI Analysed

## Benefits

- free draining
- easy to apply
- open free draining
- less likely to cap
- typically 247mm/hour drainage rate
- won't block or cap existing material
- promotes and sustains growth
- nutrient retentive
- assists seed establishment
- peace of mind
