

Sports&Turf

The sand is predominantly medium to coarse and sub angular in shape, which assists free drainage and promotes good integration into the surface of the turf.

The soil within the blend contains both phosphorous and potassium, which contributes to soil fertility and encourages healthy growth.

The combination of specialist sand and soil is ideal for grass establishment and maintenance.

A 90% sand based dressing

STRI Statement

“Sports&Turf is suitable for use on natural soil constructions and offers the advantage of providing nutritional benefits to the turf, as evidenced by turf green-up seen on test plots in Autumn 2017”

- ✓ Soil based pitch dressing
- ✓ Fairway dressing
- ✓ Tee construction

Features	Benefits
90% total sand 50% V Coarse to Medium sand	<ul style="list-style-type: none"> • Free draining • Easy to apply
Sub Angular Sand	<ul style="list-style-type: none"> • Open free draining • Less likely to cap
Screened to 10mm	<ul style="list-style-type: none"> • No issues with stones
Typically contains 50% Coarse and Medium Sand	<ul style="list-style-type: none"> • Won't block or cap existing fairway material
BS3882:2015 compliant topsoil	<ul style="list-style-type: none"> • Promotes and sustains growth • Nutrient retentive • Assists seed establishment
STRI Analysed	<ul style="list-style-type: none"> • Peace of mind
Total Porosity typically 36.5% (USGA 35-55%)	<ul style="list-style-type: none"> • Water freely moves through the surface
