

TOPSOIL

Responsibly sourced,
consistently better -
The experts that care

SubSoil is found immediately below the Topsoil. It is typically less fertile and lighter in colour than Topsoil.

Free Draining Subsoil is a fully analysed subsoil. With a sand content of 95% typically, it is designed for use on projects where a free draining subsoil is needed such as lawns, sports pitches and tree pits.

SubSoil

- ✓ Turfing
- ✓ Planting
- ✓ Pitches and Lawns
- ✓ Tree Pits

- High total sand content for excellent drainage
- Perfect for use beneath Landscape20 and Hortloam

Features	Benefits
