

Landscape20

A general-purpose, high-quality topsoil, compliant to BS3882:2015

The clay and silt in Landscape20 help retain both its moisture and inherent nutrient content, especially phosphate, potassium and magnesium, which are essential for healthy germination and subsequent growth.

Crucially, in non-irrigated areas Landscape20 will naturally hold water, helping to keep schemes green and healthy during periods of dry weather.

Landscape20's comprehensive analysis has gained the confidence of regulators making it the topsoil of choice for contractors.

NHBC Statement

The National House Building Council has allowed TOPSOIL to use the following statement:

British Sugar TOPSOIL can help builders meet the requirements of NHBC Standards, Chapter 10.2 - 10.28 "Drives, paths and landscaping for topsoil"
