## Use the handy volume calculator below to estimate your topsoil requirements

Step 1 Product volume calculator
For rapid access to British Sugar TOPSOIL's quick and easy online calculator, use the QR code in the bottom right corner

To calculate product volume - depth $(\mathrm{mm}) \mathrm{x}$ area $\left(\mathrm{m}^{2}\right)=$ cubic metres $\left(\mathrm{m}^{3}\right)$

|  |  | Depth in mm |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 50 | 75 | 100 | 125 | 150 | 175 | 200 | 225 | 250 | 275 | 300 |
|  | 20 | 1.00 | 1.50 | 2.00 | 2.50 | 3.00 | 3.50 | 4.00 | 4.50 | 5.00 | 5.50 | 6.00 |
|  | 25 | 1.25 | 1.87 | 2.50 | 3.12 | 3.75 | 4.37 | 5.00 | 5.62 | 6.25 | 6.87 | 7.50 |
|  | 30 | 1.50 | 2.25 | 3.00 | 3.75 | 4.50 | 5.25 | 6.00 | 6.75 | 7.50 | 8.25 | 9.00 |
|  | 35 | 1.75 | 2.62 | 3.50 | 4.37 | 5.25 | 6.12 | 7.00 | 7.87 | 8.75 | 9.62 | 10.50 |
|  | 40 | 2.00 | 3.00 | 4.00 | 5.00 | 6.00 | 7.00 | 8.00 | 9.00 | 10.00 | 11.00 | 12.00 |
|  | 45 | 2.25 | 3.37 | 4.50 | 5.62 | 6.75 | 7.87 | 9.00 | 10.12 | 11.25 | 12.37 | 13.50 |
|  | 50 | 2.50 | 3.75 | 5.00 | 6.25 | 7.50 | 8.75 | 10.00 | 11.25 | 12.50 | 13.75 | 15.00 |
|  | 100 | 5.00 | 7.50 | 10.00 | 12.50 | 15.00 | 17.50 | 20.00 | 22.50 | 25.00 | 27.50 | 30.00 |
|  | 500 | 25.00 | 37.50 | 50.00 | 62.50 | 75.00 | 87.50 | 100.00 | 112.50 | 125.00 | 137.50 | 150.00 |
|  | 1000 | 50.00 | 75.00 | 100.00 | 125.00 | 150.00 | 175.00 | 200.00 | 225.00 | 250.00 | 275.00 | 300.00 |
|  | 1250 | 62.50 | 93.75 | 125.00 | 156.25 | 187.50 | 218.75 | 250.00 | 281.25 | 312.50 | 343.75 | 375.00 |

## Step 2 Tonnage calculator

To calculate tonnage cubic metres x bulk density $=$ tonnes ( t )

Bulk Densities (i.e. the typical weight of a cubic metre of product at light consolidation)

## SubSoil

We offer two different types of SubSoil, NHBC
Accepts BS8601:2013
General Purpose SubSoil, and Free Draining SubSoil Bulk Density 1.6 tonnes/m ${ }^{3}$

## Landscape 20

NHBC Accepts BS3882:2015 General Purpose topsoil, ideal for landscaping, seeding and turfing. Bulk Density 1.7 tonnes/m ${ }^{3}$

## HortLoam

Premier BS3882:2015 planting soil enriched with PAS 100 compost, for trees, shrubs, ornamentals and vegetables. Bulk Density 1.6 tonnes $/ \mathrm{m}^{3}$

## Other useful bulk densities:

Dry sand fine: 1.2t/m³
Dry sand coarse: $1.6 \mathrm{t} / \mathrm{m}^{3}$
Shingle: $1.6 \mathrm{t} / \mathrm{m}^{3}$

- Pea gravel: $1.8 \mathrm{t} / \mathrm{m}^{3}$ MOT Type 1: $1.9 \mathrm{t} / \mathrm{m}^{3}$

1. What is the source of your subsoil and topsoil? Greenfield/brownfield/skip/ manufactured?
2. Is there an auditable process from source through to delivery?
3. Is all the soil from a single source?
4. How is your topsoil stored? (Stored under cover is preferable)
5. How much is available? (Is there enough for the project?)
6. How is it sampled, how often is it tested, and is there a current analysis and Declaration of Compliance to BS3882:2015 or BS8601:2013 available? (Beware - any analysis older than six months is unlikely to be representative)
7. Who else do you supply?

## TOPSOIL's Landscape20 is an NHBC Accepted product.
